# A. Odd One Out

time limit per test 1 second
memory limit per test 256 megabytes
input standard input
output standard output

Rating: 800 | Tags: bitmasks, implementation | https://codeforces.com/problemset/problem/1915/A

You are given three digits $a$, $b$, $c$. Two of them are equal, but the third one is different from the other two.

Find the value that occurs exactly once.

## Input

The first line contains a single integer $t$ ($1 \le t \le 270$) — the number of test cases.

The only line of each test case contains three digits $a$, $b$, $c$ ($0 \le a, b, c \le 9$). Two of the digits are equal, but the third one is different from the other two.

## Output

For each test case, output the value that occurs exactly once.

## Example

**Input**

```
10
1 2 2
4 3 4
5 5 6
7 8 8
9 0 9
3 6 3
2 8 2
5 7 7
7 7 5
5 7 5
```

**Output**

```
1
3
6
7
0
6
8
5
5
7
```
