You are given two integers x and y.

Output two integers: the minimum of x and y, followed by the maximum of x and y.

Input

The first line contains a single integer t ($1 \le t \le 100$) — the number of test cases.

The only line of each test case contains two space-separated integers x and y ($0 \le x, y \le 9$).

Output

For each test case, output two integers: the minimum of x and y, followed by the maximum of x and y.

Example

Input

```

1 9
8 4
1 4
