Distinct Values Subarrays

Time limit: 1.00 s
Memory limit: 512 MB

CSES 3420 | Sorting and Searching | https://cses.fi/problemset/task/3420

Given an array of n integers, count the number of subarrays where each element is distinct.

Input

The first line has an integer n: the array size.

The second line has n integers $x_1,x_2,\ldots,x_n$: the array contents.

Output

Print the number of subarrays with distinct elements.

Constraints

- $1 \le n \le 2 \cdot 10^5$
- $1 \le x_i \le 10^9$

Example

Input
4 1 2 1 3

Output
8

Explanation: The subarrays are [1] (two times), [2], [3], [1,2], [1,3], [2,1] and [2,1,3].
